STAFF ADVISORY

1. BACKGROUND

The City of Fairview Heights Development Code divides the City into districts and establishes standards for lot width, yard setbacks, area, and more. The standards vary amongst zoning districts and are specific to the characteristics of each. In addition, the Development Code establishes standards for parking, lighting, signage, accessory uses and more.

The subject property located at St. Clair County PIN(s) 03-21.0-303-007 is zoned R3 – Single Family Residential. The applicant is seeking to reduce the setback dwelling and detached carport from 10' to 4' from 14-08-24 (D). The applicant is requesting to reduce the setback dwelling and detached carport from 10' to 4'.

2. Area-Bulk Variance Criteria

In accordance with 14-14-12 Zoning Board of Appeals: Interpretation Procedure, no area-bulk variance in the application of any provisions of this Code shall be recommended by the Board, unless it finds:

(a) That special circumstances or conditions fully described in findings of fact apply to the land or buildings for which the area-bulk variance is sought, which circumstances or conditions are peculiar to such land or buildings and do not apply generally to the land or buildings in the neighborhood, and that said circumstances or conditions are such that strict application of the provisions of this Code would deprive the applicant of a reasonable use of such land or building;

(b) that, for reasons fully set forth in the findings, the recommending of the area-bulk variance is necessary for the reasonable use of land or buildings, and that the variance as recommended by the Board is the minimum variance that will accomplish this purpose;

(c) that the recommending of this variance will be in harmony with the general purpose and intent of this Code and will not be injurious to the neighborhood or otherwise detrimental to the public welfare. In addition to considering the character and use of adjoining buildings and those in the vicinity, the Board, in making its recommendations shall take into account whether the conditions of the subject premises are peculiar to the lot or tract described in the petition. Should it be determined that the conditions are part of the general condition of the neighborhood, then it shall be so noted and the Board may recommend appropriate corrections to Code.

APPLICATION NUMBER: PC 12-25

REQUEST: Preliminary Plat to allow 29 Fairview Hills to split the lot in the “R-3” Single Family Residential zoning district at Coventry Ct, Fairview Heights. Also identified by St. Clair County PIN(s) 03-19.0-207-015.
VOTE REQUESTED.

APPLICANT NAME: JPL Design & Build LLC

MEETING DATE: July 8, 2025

ZONING: R3 – Single Family Residential

PLANNING COMMISSION ACTION: Consideration of the Preliminary Plat, make recommendation to the Community Committee and City Council which has final authority to approve or deny the request.

GENERAL LOCATION:

STAFF ADVISORY

1. BACKGROUND

The City of Fairview Heights Development Code establishes procedures for the division of land into two or more lots. A “Minor Subdivision” is the division of land into two (2), but not more than six (6) lots. The applicant is proposing to divide one lot into two, and is therefore defined as a “Minor Subdivision”. Development Code Section 14-13-26: Subdivision Application, Minor Subdivision exempts minor subdivisions from the preliminary plat procedures and requirements and permits the subdivider to proceed to the final plat review process. Subdivision procedures for a final plat include administrative review, consideration by Planning Commission and final action by City Council. In considering a Final Plat, the reviewing authorities are to ensure the submittal meets the technical requirements of the Development Code. If a Final Plat meets the criteria, it shall be recommended for approval.

The subject property located at 29 Fairview Hills is zoned R3-Single Family Residential. This zoning district has a minimum lot size of 6,000 sq ft. The proposed plat would create one lot being 12,000 sq ft and one lot being 15,000 sq ft. Both lots would meet the minimum. Both lots meet the minimum lot width and depth requirements.

2. DISCUSSION

Context

The subject site is located in the western portion of the City, north of Interstate 64, and west of Bunkum Road. It is comprised of one parcel.

The zoning designation for these parcels is R-3 – Single Family Residence. This zoning district is intended to encourage the creation and maintenance of stable and enduring residential areas by establishing limitations on the use and character of development so as to take advantage of, or to avoid conflict with, natural topography, existing development, arrangements, and locations of existing or planned community facilities and social needs of the City.

Zoning: Site and Surrounding Areas

The zoning and land uses of adjoining and surrounding properties are as follows:

North: R-3 - Single Family Residential;

South: R-3 - Single Family Residential;

West: R-3 – Single Family Residential;

East: R- 3 - Single Family Residential.

Future Land Use: Site and Surrounding Areas

The Fairview Heights Comprehensive Plan identifies the subject site as single family residential. The proposed plat providing two individual single family lots conforms with the comprehensive plan.

Proposed Preliminary Split

Planning Considerations

The existing parcels within the subject site are comprised of three parcels of land comprising 0.99 acres. The proposed subdivision would create six lots ranging from 5836 to 7564 square feet acres. None of the lots meet the minimum requirement.

At issue is whether or not the proposed Final Plat meets the technical requirements of Development Code 14-13-28 Subdivision Application, Final Plat as below:

14-13-28 SUBDIVISION APPLICATION, FINAL PLAT.

A final plat to be provided by the subdivider shall meet the following specifications:

- (A) The final plat may include all or only a part of the preliminary plat which has received approval.
- (B) The plans of the final plat shall be drawn on new linen tracing cloth or polyester base film, with waterproof black ink to a scale not greater than one hundred feet to one inch (100' to 1"); provided that the resulting drawing would not be greater than thirty-six (36) inches square. Four (4) cloth or polyester base film positives of the final plat shall be provided to the City by the subdivider at the time of final plat application.
- (C) All dimensions shall be shown in feet and decimals of a foot.
- (D) All surveys for a final plat shall be made under the active and personal direction of a registered land surveyor of Illinois, and the following basic information shall be shown:
 - (1) Accurate boundary lines, with dimensions and bearings or angles, which provide a survey of the tract, closing with an error of closure of not more than one foot in five thousand feet (1' in 5,000').
 - (2) Accurate distances and directions to the nearest established quarter section corner monument. Reference corners shall be accurately described on the final plat.
 - (3) All elevations shall be referenced to the established datum and the said reference shall be clearly stated on any plans or drawings showing such datum, provided that bench marks are located within a reasonable distance. Where spot elevations are taken from USGS Map as the datum used for a bench mark, it shall be so shown on the plat.
 - (4) Accurate locations of all existing and recorded streets intersecting the boundaries of the tract, shown by heavy solid lines.
 - (5) Right-of-way line of streets, easements and other rights-of way and property lines and areas of lots and other tracts, with accurate dimensions, bearings and curve data, including radii, arcs and chords, points of tangency, and central angles.
 - (6) Name and right-of-way width for each street or other right of-way.
 - (7) Location, dimensions and purposes of any easement, shown by light, dashed lines.
 - (8) Number to identify each lot or site.
 - (9) Purpose for which sites, other than residential lots, are dedicated or reserved.
 - (10) Lot dimensions and areas of each lot and building setback lines and dimensions.
 - (11) Location, type, material, and size of all monuments and lot markers.
 - (12) Restrictions of all types which will run with the land and become covenants in the deeds for lots. Restriction lines should be shown by medium, dashed lines.
 - (13) Title or name of subdivision, Section, Township and Range numbers in which the subdivision is located; and north arrow, scale and date.

(14) Certification by registered Illinois Land Surveyor with registration numbers and seal affixed to all final documents of the final plat.

(15) Certificate of dedication of all public areas.

(16) Certificate that all taxes due have been paid

The proposed Minor Subdivision is in conformance with the requirements of 14-13-28.

1. BACKGROUND

The City of Fairview Heights Development Code divides the City into districts and establishes a set of land uses that are either “permitted” or “special”. A special use may be allowed after a review by Plan Commission and City Council, in accordance with Development Code section 14-14-09. Each special use is evaluated on its own merits.

The applicant is seeking approval for a private auto service facility.
